# About Event

Unplug: By The Beach is your chance to break the routine and dive into something real. Organized by the Google Developer Student Clubs at Fr. Conceicao Rodrigues College of Engineering, this three-day, two-night retreat in Alibaug focuses on connecting, learning, and building your future—no fluff, just results.

If you're ready to unplug and dive into an experience that can kickstart your journey, this is the event you can't miss. Join us at the beach and see where your ideas lead.

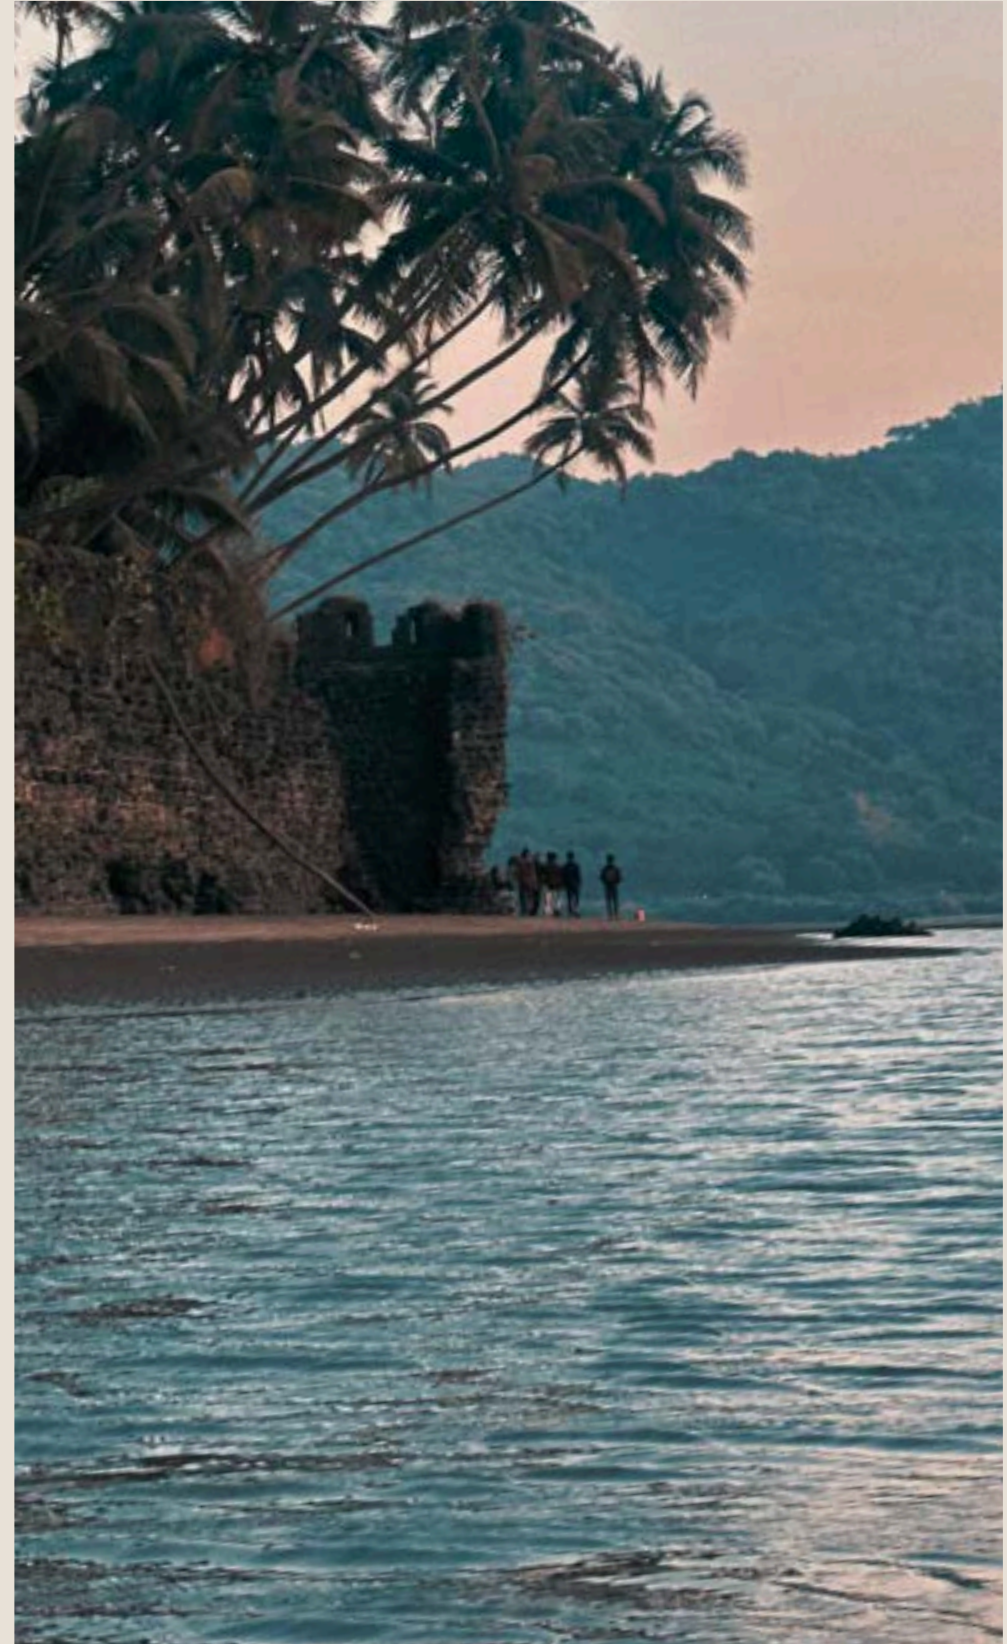

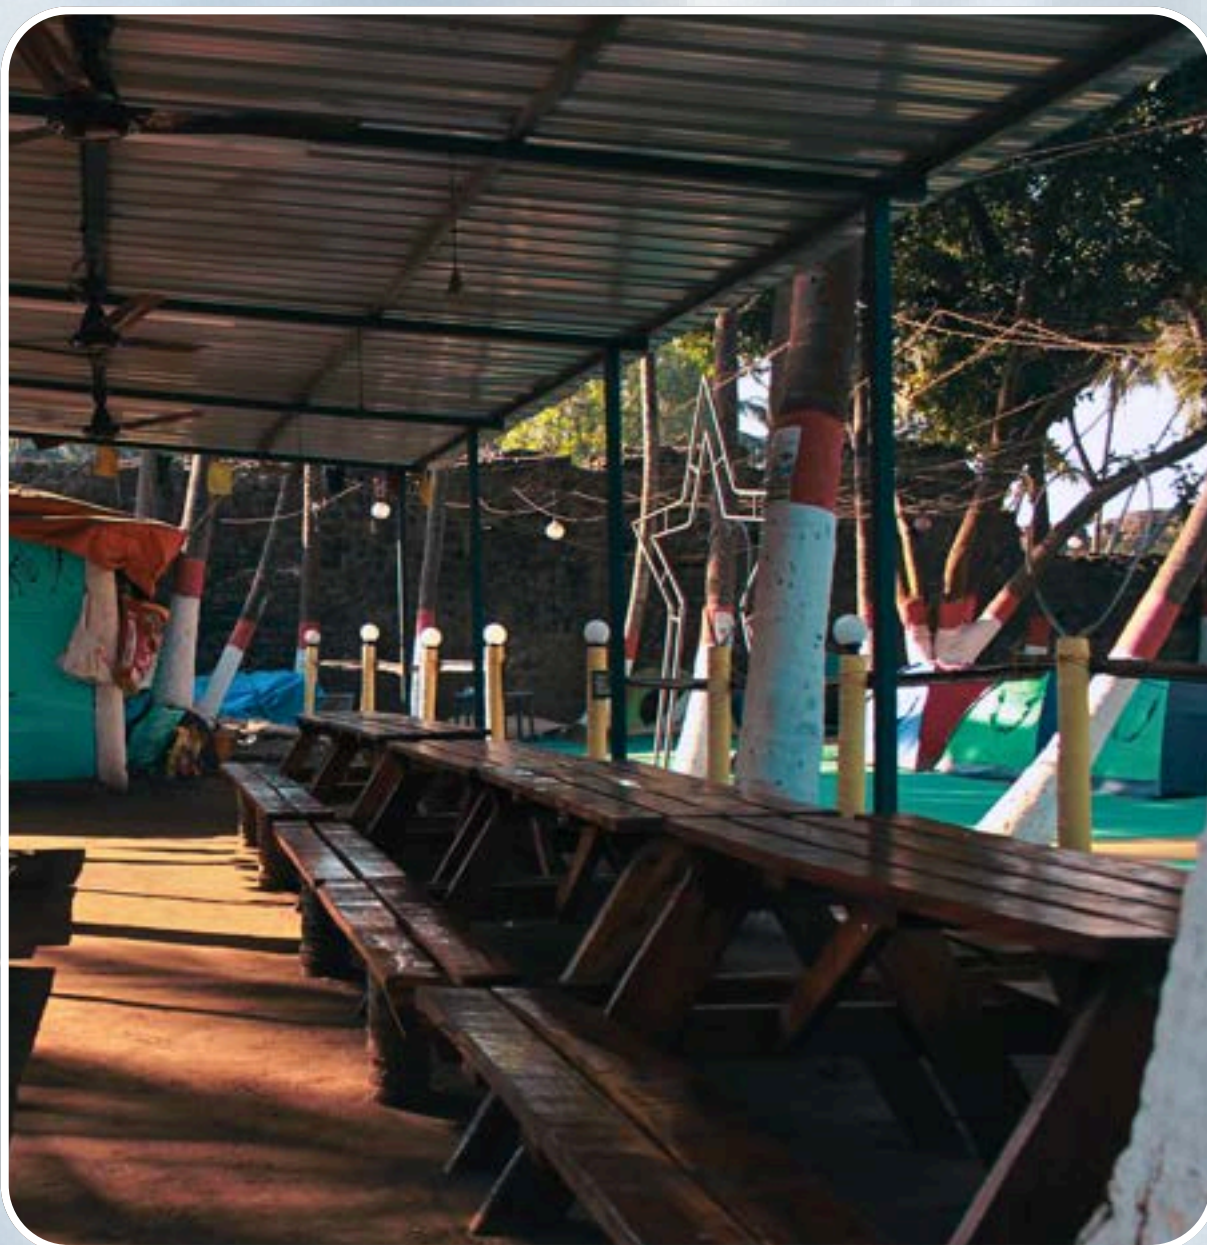

# What To Expect

Admission is exclusive, bringing together a sharp, motivated group of students ready to turn ideas into action. You'll work closely with top investors and speakers in hands-on workshops designed to take your startup from concept to reality.

Beyond workshops and talks, this event offers more than just learning. Compete for cash prizes, pick up exclusive goodie bags, and unwind by the bonfire or barbecue, all set against a beachside backdrop. It's networking without the stiff formality — just real connections in a setting that feels like a retreat.
